**VEHICLE APPLICATION GUIDE**  
**JANUARY 2013**

**EXPORT**

# To Our Valued Customers

This Export Vehicle Application Guide covers the vehicles for which we supply a range of ARB manufactured products, including our bull bars. In most cases these applications are based on the vehicles as they are available in Australia. We suggest that this guide should be used in conjunction with the current Old Man Emu application catalogue and the current Air Locker application chart as these are the most accurate guides for suspension and Air Locker systems.

Due to some vehicle manufacturers using a range of manufacturing origins to produce their vehicles, there may be applications listed that do not apply or may need to be altered in some countries. Where appropriate model codes and vehicle release dates are included, however, these dates relate to Australian release dates and may differ from those in your market. If you are unsure of an appropriate vehicle model within this guide, we suggest that you contact an ARB sales representative who would be delighted to assist.

There are some vehicles that although we are yet to develop a bull bar for, we still have a range of accessories such as Old Man Emu suspension, lights, tow bars, Air Lockers, snorkels, etc to suit.

We are continually sourcing and designing new products to add to our range, so if your vehicle or a particular accessory is not listed here please enquire with ARB directly - we may have just what you're after.

Please note that the bull bars detailed in this guide are fully compatible with air bag systems (when factory fitted to the vehicle), unless otherwise stated. For information on the technology behind our bull bars, and how air bag compatibility is achieved, please refer to the ARB catalogue.

#### **COMBINATION BAR**

<sup>1</sup>(3421770) Combination Bar - All models with Front Parking Sensors

<sup>1</sup>Suits Warn & Magnum 8/9/9500lb low mount winches

Note: Due to the unique inboard positioning of the low beam headlamps on this vehicle, on models with HID (Xenon) headlamps, some minor shadowing can be expected from the bull bar and other accessories. This does not affect the headlight performance or compliance with ADRs. ARB recommends the fitting of Sahara Bumpers to HID (Xenon) headlight models. This will be more noticeable during cornering due to the automated movement of the headlights.

Selected models are fitted with optional centre grille located camera. Vision from this camera will unavoidably be obstructed in some cases where bars and accessories are installed.

The radar for front collision system option on some models is also located in the grille badge. Structures forward of this device may affect the operation of the radar system.
